

Supplier Catalogue Import Rescue Audit

Synthetic sample showing how a messy supplier product file is checked before a Shopify, WooCommerce, Matrixify, or migration import.

Fixed first step: \$199 audit

No production import before file review

Rows reviewed

8

Importability

34.6%

Exceptions

10

Blockers

6

Example blockers

Row	SKU	Issue	Severity
2	EVSE-7KW-001	Duplicate SKU	blocker
5	ADAPT-32A	Missing title	blocker
6	WALL-MOUNT-01	Invalid price	blocker
7	RFID-CARD-10	Missing stock	blocker
8	SOCKET-T2	Negative stock	blocker
9	DISPLAY-LCD	Missing image	warning

What the buyer receives

- Importability score and field mapping
- Row-level exception CSV
- Cleaned representative sample rows
- Blockers separated from review-only warnings
- Fixed quote for the full catalogue rescue

This is a data-quality checkpoint, not manual product listing. It catches bad product records before they are imported at scale.

Cleaned Shopify-ready sample

Blocked rows stay in draft status until the buyer reviews exceptions.

```
_audit_status, Handle, Variant SKU, Price, Stock, Status
blocked, 7kw-wallbox-charger, EVSE-7KW-001, 499, 12, draft
blocked, 7kw-wallbox-charger-duplicate, EVSE-7KW-001, 499, 12, draft
review, type-2-charging-cable-5m, CABLE-T2-5M, 129, 30, draft
blocked, adapt-32a, ADAPT-32A, 79.90, 8, draft
blocked, wall-mount-bracket, WALL-MOUNT-01, -, 15, draft
```

Ask for: supplier CSV/XLSX + target platform/import template + current error screenshot.
